

*BIO-Oceans Association announces the publication of a major treatise reviewing the history and marine research accomplishments at Canada's Bedford Institute of Oceanography over five decades primarily in the Atlantic and Arctic Oceans*

# VOYAGE OF DISCOVERY

## Fifty Years of Marine Research at Canada's Bedford Institute of Oceanography

Edited by  
D.N. Nettleship, D.C. Gordon,  
C.F.M. Lewis and M.P. Latremouille

**Voyage of Discovery** summarizes BIO research results on the oceanography of Arctic and Eastern Canada. In a series of 48 papers by past and present research staff from all oceanographic disciplines at BIO, the history of Canadian oceanography before BIO and a broad cross section of the Institute's work spanning five decades are featured with particular emphasis on contributions to Canadian and global understanding/management of the marine environment.

Divided into 12 sections with a Preface and Epilogue, **Voyage of Discovery** is the most extensive overview of the history and scientific accomplishments of the Bedford Institute of Oceanography under one cover: Historical Roots, Arctic Studies, Ocean Life, Ocean Circulation and Chemistry, Hydrography and Seabed Mapping, Geological Oceanography, Fisheries-Ecosystems-Aquaculture, Marine Contamination, Technology and Instrument Development, Energy Developments, BIO and the Law of the Sea, and The BIO Experience. This book's well-written and illustrated accounts will appeal to a broad readership from professional oceanographers and environmental/resource managers and decision-makers to marine science students and lay persons interested in the Arctic and Atlantic oceans, and their present status and future welfare.

Hardcover, text on premium 8.5 x 11 inch glossy 100 wt Sterling paper with sewn binding.  
460 pages, 2.2 kg. Price: \$35.00 Cdn/US plus shipping ISBN 978-0-9936443-0-6  
BIO-OA Publication: September 2014
